PROFILE

Advanced Programming student at UTN (Argentina). I build complete web applications with **Angular and TypeScript**, using **Supabase** or my **own API with NestJS and MongoDB** as the backend, from data modeling to deployment. Experienced working in teams with Git, plus 4+ years leading teams in customer-facing roles. Looking for my first developer position.

PROJECTS

Hollownest Cinema — Movie ticketing system hollownestcinema.vercel.app

Angular · TypeScript · Supabase (PostgreSQL) · PWA · Vercel

- Full app built from a client's evolving requirements: showtimes, seat booking, concessions, coupons, loyalty points and an admin panel with reports.
- PostgreSQL database with **Row Level Security**, email and Google login, and **role-based** protected routes (customer, staff, admin).
- **Real-time** seat availability with Supabase Realtime, and PDF tickets with **QR codes** that staff validate with the camera.
- Modern Angular (standalone components, signals, reactive forms), installable as a **PWA**.

TONARI — Social network for anime and manga communities tonari-front.vercel.app

Angular · NestJS · MongoDB · JWT · Cloudinary · PWA · *in progress*

- Social network built from scratch with my **own REST API in NestJS**: posts with images, likes, comments, profiles and followers.
- **JWT** authentication with session refresh, hashed passwords, roles, and Google and Discord login.
- Admin dashboard with user management and **statistics charts**; "My Library" module for anime and manga connected to a public API.

OverCooked 2026 — Restaurant mobile app Final project · team of 4

Ionic · Angular · Capacitor (Android) · Supabase · Git

- Cross-platform app for running a restaurant, built with per-member branches and feature-based deliveries.
- I built employee, dish, drink and table management, customer sign-up by **scanning the ID card QR code**, and the satisfaction survey.

Other projects github.com/Agusslo

- **Aguss Tools:** file converter that runs 100% in the browser (images, PDF, DOCX) with JavaScript.
- **Hall of Legends:** C# desktop app (Windows Forms) with SQL Server, login, roles and CRUD.

TECHNICAL SKILLS

Frontend	Angular, TypeScript, JavaScript, HTML, CSS, Sass, Ionic, PWA, React
Backend & data	NestJS, Node.js, Express, REST APIs, JWT, Supabase, PostgreSQL, MongoDB, MySQL, SQL Server
Tools	Git, GitHub, Vercel, Capacitor, Cloudinary, Linux
Other languages	C#, Java, Python, C
Languages	Spanish (native) · English A2/B1: strong technical reading and writing (A2 certificate, UBA)

WORK EXPERIENCE

Store Manager — Kiosco Baires10 (seasonal) Seasons 2024 – 2026

- I manage staff, cash, inventory and supplier orders. I built a small web app to track the store's stock.

Community Manager — Freelance 2024 – Present

- Managed social media for several accounts: content, editorial calendar and metrics analysis.

Shift Manager — Helados & Café Pirulo 2021 – 2024

- Trained and coordinated the service team; handled purchasing, inventory and cash closing.

EDUCATION & CERTIFICATIONS

Higher Technical Degree in Programming Systems — UTN Avellaneda 2022 – Present

Advanced student, final project in progress.

English, Level 6 — Language Laboratory, School of Philosophy and Letters (UBA) 2026

Passed with 87/100 · CEFR level A2.

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle 2025

High School Diploma in Economics and Business — Instituto María Auxiliadora 2016 – 2021
